

INNOVATIVE SOLUTIONS

SECURE AND RELIABLE SEALING OF POWER CABLES

Whether onshore or offshore Hauff-Technik provide comprehensive support for an entire project...

- Individual technical planning
- Technical project supervision
- Training, if required
- On-site offshore service

The company also offers a whole range of specially constructed solutions for the implementation of difficult offshore projects as well as on-site supervision by specially trained personnel, such as on offshore platforms.

EXPERTISE AND EXPERIENCE

The company is the ideal choice for qualified advice and support – no matter what the sealing task is. Their expertise and many years of experience in the sealing of buildings provide a sound basis for this.

A large number of wind power plants today have already been fitted with the company's systems.

FLEXIBILITY

To the company, flexibility means either: Individual, when and wherever necessary. Or standardised, when and wherever possible.

The sealing of cables in the field of wind power involves some very individual demands. The company's researchers and developers are particularly well equipped for this. They endeavour to clarify client's requirements in the best possible way, in order to realise the most suitable sealing product.

The successful development of made-to-measure solution requires our product components to be extremely flexible. It is this flexibility, in particular, that Hauff-Technik's individually manufactured seals are endowed with.

In this way, the company is able to develop special products designed according to a client's specifications – even for the most specialist of demands.

DEVELOPING SOLUTIONS

Hauff-Technik is one of Europe's leading manufacturers of cable and pipe wall penetrations, and has been developing solutions for the energy supply and construction industries since 1955. With a range of more than 3,000 products, over the next few years, the company aims primarily to intensify its expertise in the energy transformation markets, while continuing to increase turnover.
