

## PRESS RELEASE

### **ZWEICOM-HAUFF: THE WAY TO FAST INTERNET - Member of the German parliament Roderich Kiesewetter visits ZweiCom-Hauff in Rosenberg**

All political leaders want to create a gigabit society by 2025. This requires fibre optic expansion into a network that can grow with demand. Zweicom-Hauff supplies necessary components.

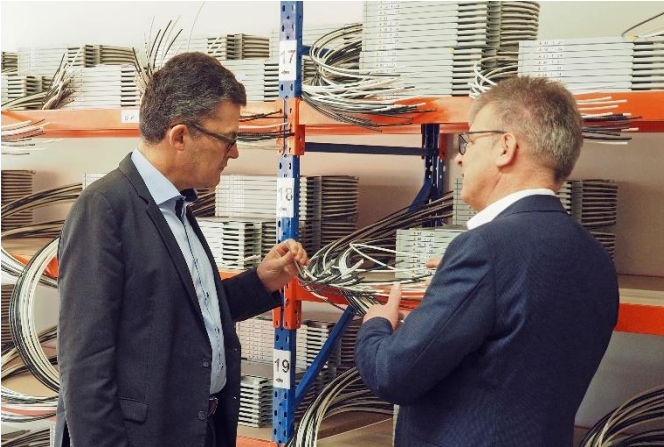

**Rosenberg, 24.01.2018** – The Union and SPD parties want to enshrine the right of all citizens to a broadband connection from 2025. For this purpose, a legally protected right will be established on 1<sup>st</sup> January, 2025, which will be formulated by the middle of the legislative period, according to a partial draft of the coalition agreement.

*From the left:  
Dr. Michael Seibold, Ralf Hammer, Member of the Bundestag  
Roderich Kiesewetter*

The company ZweiCom-Hauff is ready for these promising challenges. Founded by Ralf

Hammer in 2005, the company offers customised and well-engineered solutions tailored to customer needs. High-quality and high-performance components for passive networks that grow with demand are produced at the company headquarters in Rosenberg.

*Member of the Bundestag Roderich Kiesewetter talking to Ralf Hammer about the modules that are necessary for fibre optic expansion*

The member of the Bundestag Roderich Kiesewetter was able to get an idea of this himself when he paid a visit to the successful company and learned about the special features.

ZweiCom-Hauff products offer flexible and controlled fiber management system; thanks to the innovative modules, these can be quickly, easily, and simply clicked into different housings, cabinets, or sleeves and combined with each other.

### **Assembly time on site costs money**

That's why ZweiCom-Hauff prioritises the industrial prefabrication and packaging of components. Intelligent options for working from home with fair pay guarantee a high standard of quality. Whether it's an optical central office or multifunction cabinets for broadband networks – every product can be made highly customised so it is "made for me".

### ***Come find us at the FTTH Conference 2018 in Valencia***

*ZweiCom-Hauff welcomes you to the FTTH Conference, 13<sup>th</sup> - 15<sup>th</sup> February 2018 in Valencia, Spain. You'll find high-quality and high-performance components for fiber optic networks at our stand S23.*
